

Hi. I'm Mike Schreiner, Leader of the Green Party of Ontario and candidate to be Guelph's next MPP. I believe Guelph can lead Ontario into the clean economy so we can create jobs that put people and planet first. I will be a champion for Guelph. I will fight for a prosperous, livable future for us, our children and grandchildren.

It's time to leap into the future now. The Green Party of Ontario has a fully costed nine-point platform to protect the people and places we love while seizing opportunities in the emerging clean economy. We will skate to where the puck is going, not where it's been. We will support strong public services and innovative solutions to fight the housing, mental health, and climate crises. We will be honest with you about how to pay for it.

Jobs

- Build a bridge to the clean economy by redirecting \$3.1 billion in business support programs towards cleantech innovation, advanced manufacturing and bio-products.
- Make our homes and businesses more energy efficient with a \$4.18 billion Green Building and Business Program to save energy, lower bills and create jobs.
- Lower payroll taxes on the 400,000 small businesses in Ontario, giving them cash flow relief to pay better wages and create more jobs in the community.

People

- Unlock housing so everyone has a place they can afford to call home by requiring that 20% of all new housing developments are affordable.
- Invest \$4.1 billion as a first step towards covering mental health under OHIP+ and transforming our healthcare system towards one that prevents illness.
- Implement a Basic Income Guarantee as a whole new way to tackle income inequality and cut red tape for those living in poverty.

Planet

- Permanently protect Ontario's prime farmland and water source regions, including expanding the Greenbelt, and strengthen the laws around using our precious resources.
- Power Ontario with 100% renewable energy by 2050 by saying no to expensive nuclear and saying yes to low-cost water power and community-based renewable energy.
- Build clean and well connected public transit and pay for it with sustainable funding through expert recommended road pricing tools that have worked around the world.
